MEMORANDUM FOR: NFAC Career Development Officer
FROM : Director, Imagery Analysis
SUBJECT : Career Training -- NFAC Policy on EOD Grade

I agree that CTs assigned to NFAC should have some on-the-job experience before they are considered for promotions. And, six months -- as a general rule -- sounds like a reasonable amount of time. I do suggest, however, that some degree of flexibility be incorporated into such a policy to accomodate those who warrent an earlier promotion as well as those who are not doing so well and may require a longer period of review.

Noel E. Firth
